APPENDIX.

JAIPUR STATE.

Table A-1.—Area (in acres) of each District in Jaipur, from 1892-93 to 1894-95 351
Table A-2.—Classification of the area (in acres) of each District in Jaipur, from 1892-93 to 1894-95 . . 352—353
Table A-3.—Area (in acres) under Crops in each District in Jaipur, from 1892-93 to 1894-95 . . 354—357
Table A-4.—Live-stock, ploughs, and carts in each District in Jaipur, from 1892-93 to 1894-95 . . 358
Table C.—Incidence of the Land Revenue on area and population in each District of Jaipur in 1894-95 . . . . 360—361

Vernacular terms used in the explanatory Memorandum.

Bané (Coorg).—Forest land granted for the service of the holding of rice-fields to which it is allotted to be held free of revenue for grazing, leaf manure, firewood, and for timber required for the farm.

Inam (Madras and Mysore).—Wholly or partially revenue-free tenure.

Istamrári (Panjab and Ajmere-Merwara).—A tenure which, though the revenue is assigned, is charged with a permanently fixed quit-rent.

Izafat (Bombay).—A form of service tenure.

Izara (Berar).—Land leased under the waste-land rules on stipulated terms.

Jagir (Berar).—Alienated villages or lands granted as rewards for service either rent-free or on payment of a quit-rent; such lands are hereditary.

(Ajmere-Merwara).—Land granted revenue-free on condition of military or in consideration of political service.

(Coorg) or *Umbli*.—Lands granted on reduced rates to individuals on account of services rendered to the State by themselves or their ancestors.

Jamma (Coorg).—A military tenure in Coorg under which certain Coorgs hold lands on half the ordinary assessment, and in return are liable to be called on to perform certain services, such as escorting treasure and military service if required.

Jodi (Madras).—Portion of the assessment reserved or left unalienated when lands were originally granted on favourable assessment. It is distinguished from quit-rent, which represents an additional charge (generally a certain proportion—one-eighth, one-fourth, one-half, or five-eighths—of the full assessment, minus the Jodi) imposed when the tenures were enfranchised or converted into free-holds.

(Coorg).—Lands on which half the assessment is paid to Government and half to the village or other temple.

Khalsa (Bombay).—Government occupancy or ryotwari tenure.

(Central Provinces).—Land paying revenue to Government.

(Berar).—Government land paying full revenue to Government.

(Ajmere-Merwara).—Land paying full revenue to Government.

Khatadar (Berar).—A registered occupant whose name is entered by authority in the Government records as holding unalienated land.

Khiraj (Assam).—Land assessed to full revenue.

Khoti (Bombay).—A form of tenure, found chiefly in the Konkan, the holder of which is, in return for certain semi-proprietary rights, held responsible for payment of assessment on the area held.

Kwin (Upper Burma).—Villages consisting of groups of independent holdings.

Lakhiraj (Assam).—Revenue-free land.

Lambardar (North-Western Provinces).—The headman or village representative, who is primarily responsible for the collection and payment to Government of the land revenue of a village or a section of a village.

Malguzari (Central Provinces).—A form of tenure, the holder of which is responsible for the payment of the revenue assessed on a village or number of villages.

Malikmakbuza (Central Provinces).—The proprietor of a small plot of land who has no interest in the village common lands.

Mehwasi (Bombay).—A proprietary tenure assessable to revenue at a lump sum.

Mittas, Palayams (Madras).—Certain classes of permanently-settled estates differing in their origin from zemindaris. Mittas were artificial estates created under Madras Regulation XXV of 1802, while Palayams are the estates of Poligars or old chieftains. Most of the latter have been granted title-deeds of permanent-settlement under the Regulation mentioned, but a few have not been settled, though in practice their revenue is treated as fixed.

Narvadari, Bhagdari (Bombay).—Forms of proprietary tenure involving joint responsibility for the assessment: the revenue in the former case being fixed in the lump, in the latter distributed by rates over fields.

Nazul (North-Western Provinces).—Property escheated or lapsed to the State.

Nisfkhiraj (Assam).—Land liable to pay half whatever revenue is ordinarily payable for the term of settlement.

Palampat (Berar).—Land held on payment of a quit-rent, but not necessarily hereditary.

Peshkash (Madras).—The fixed land revenue payable to Government on all permanently-settled estates.

Poramboke (Madras).—Lands reserved for public or village communal purposes.

Pôt inams (Bombay).—Lands sub-alienated in alienated villages.

Potkhrab (Berar).—The unculturable area included in a survey number.

Shrotriems (Madras).—Villages held on grant (originally to Brahmins), wholly or partially revenue-free.

Talukdari (Bombay).—A form of proprietary right in force in the northern districts of Bombay.

Udhad-jamabandi (Bombay).—A proprietary tenure subject to fixed assessment.

Umbli or *Jagir* (Coorg).—Lands granted on reduced rates to individuals on account of services rendered to the State by themselves or their ancestors.

Explanatory Memorandum.

In 1866 tabular forms proposed by a Statistical Committee were prescribed by the Government of India for general adoption as appendices to the annual reports on general administration.

In 1884, at the instance of the Secretary of State for India, certain of these forms, which related to agriculture, land, and tenures, were reconsidered and modified, after examination and discussion by a conference of officers of the Agricultural Departments. The modified returns comprised eight tables, which were compiled for the first time for the year 1884-85 and published under the title of 'Returns of Agricultural Statistics of British India.' These tables were prepared and published annually until 1887-88, when a re-arrangement was made of the headings of four statements dealing with area, irrigation, crops, and agricultural stock, though no modification was made in substance.

In 1891 the tables were again subjected to revision and to some extent recast. The revised series of 1891 has, with a few unimportant alterations, been maintained up to the present time.

The following schedule compares the three series of 1866, 1884, and 1891:—

1866.	1884.	1891.
IA. 1.—Area cultivated and uncultivated.	A.—Area cultivated and uncultivated.	A.—Total acreage, classification of areas, irrigation, current fallows, and stock.
...	Irrigation.	
IIID. 1.—Crops cultivated.	B.—Crops cultivated .	
IIID. 2.—Agricultural stock.	IIID. 2.—Agricultural stock .	
IIIE. 1.—Prices of produce.	IIIE. 1.—Prices of produce .	B.—Prices of produce.
IE. 2.—Surveyed and assessed area.	C.—Surveyed and assessed area.	C.—Incidence of the land revenue on area and population.
IE. 3.—Varieties of tenure held direct from Government.	IE. 3.—Varieties of tenure held direct from Government.	D.—Varieties of tenure held direct from Government.
IE. 4.—Varieties of tenure not held direct from Government.	Discontinued . . .	Discontinued.
IE. 5.—Register of transfers.	IE. 5.—Register of transfers	E.—Register of transfers of landed property.
IIID. 3.—Rates of rent and produce.	Discontinued . . .	Discontinued.

The notes which follow explain the changes which have been made since 1866 in the tables now published. The general instructions for the compilation of the existing series are given in the General Notes and any peculiarities in the method adopted in each province in filling up the returns are mentioned in the Provincial Notes. Such figures of particular districts as require explanation are dealt with in notes appended to the tables.

The only Native States which furnish returns at present are Mysore, whence they have been received since 1886-87, and Jaipur whence they have been received since 1892-93.

For the permanently-settled Province of Bengal no figures were available until recently. Such statistics as have been supplied for Bengal were included for the first time in the Returns of 1892-93, but they are not based upon accurate surveys or village papers, and must therefore for the most part be regarded as estimates.

TABLE A.

This table is a combination, in somewhat modified form, of the four tables A, B, Irrigation Form, and III-D-2, prescribed by the Government of India in 1884. It is divided into four sections, and was first published in its present form in 1887-88.

TABLE A-I.

This section gives the total area of each district, the areas for which statistics are and are not available being distinguished.

The corresponding tables of the earlier series are I-A-1 of 1866 and A of 1884. The headings differ as shown below:—

1866 I-A-1.	1884 A.	1891 A.-1.
Total area in square miles	Area shown by the Survey Department in acres.	Area according to Professional Survey in acres.
	Deduct—	Deduct—
	(*a*) Feudatory and Tributary States.	(*a*) Feudatory and Tributary States.
	(*b*) Area for which returns are otherwise not available.	(*b*) Area for which no returns exist.
	Net area dealt with in this return.	Net area by Professional Survey. *Corresponding area in village papers.

GENERAL NOTES.

The year to which the Provincial returns relate ends on different dates in different provinces: in Madras, the North-Western Provinces, Oudh, Upper Burma, Lower Burma, Ajmere-Merwara, and Mysore the year ends on 30th June, in Bombay on 31st July, in the Panjab on 30th September, in the Central Provinces on 31st May, and in Bengal, Assam, Berar, Coorg, and Manpur on 31st March.

Column 2.—The Professional Survey is that carried out by the Survey of India Department in Northern India, and by the corresponding Departments in the Southern Presidencies. The provincial areas shown in this column exclude Native States in direct political relations with the Government of India in the Foreign Department, but in most instances include Feudatory or Tributary States politically controlled by Local Governments.

Column 3 shows the area of any Feudatory or Tributary States included in column 1.

Column 4.—In this column is deducted the entire area (exclusive of Native States) for which the statistics required for the second and third sections of the table are not forthcoming in whole or in part. This area comprises chiefly estates held in permanent settlement or on privileged tenure, which have not been cadastrally surveyed and which possess at present no agency for the annual collection of agricultural statistics. As surveys extend and the organisation of village statistical establishments develops, the area in this column is reduced, and that dealt with in sections 2 and 3 correspondingly increased.

Columns 5 and 6.—Column 5 is a check on the accuracy of column 6. In the latter "village papers" means "the papers prepared by the village accountants." They do not in several provinces relate to the whole area included in column 5; for instance, the village returns often do not include the Forest areas. In such cases, column 6 must be taken to be the total area for which returns are available, corrected by the village papers in respect of the areas for which such papers exist. The areas of provinces and districts which are calculated from village papers are necessarily somewhat different from those given by the Survey Department, (*a*) because while the survey area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas, and (*b*) because the system followed as regards the inclusion or exclusion of areas covered by water, etc., is not uniform in the two sets of returns.

PROVINCIAL NOTES.

Madras. *Column 2.*—Shows the area as ascertained by the local Survey and Settlement Department, supplemented for tracts which have not come under the operations of that Department by areas calculated from the Imperial Topographical Survey.

* The area in village papers has been shown in the returns of the North-Western Provinces and Oudh and the Panjab since 1884-85 and 1885-86 respectively.

Column 4.—Includes chiefly areas of zamindaris or large proprietary estates permanently settled which have not been cadastrally surveyed and possess no adequate agency for the collection of statistics. The area of these estates comprises roughly one-third of the total area of the British districts of the Presidency. This column also includes the area of the agency tracts in the districts of Ganjam and Vizagapatam, and the area of all or some of the wholly inam villages in the districts of Ganjam, Vizagapatam, Kistna, Salem, and Trichinopoly for which such statistics are not available.

Column 5.—Includes, since 1893-94, the area of wholly inam villages in the North Arcot district.

Column 6.—Excludes, in 1893-94, the unsurveyed lands in the Karnul, Coimbatore, Kistna, and Madura districts, and the agency tracts of the Godavari district.

Bombay & Sind.

Column 2.—Shows the area as returned by the local Revenue Survey and Settlement Department, supplemented in the case of Native States by the returns of the Imperial Topographical Survey; includes, since 1893-94, the estimated area of unsurveyed villages in the Poona district and the area of 47 'hera' jagir villages in the Belgaum district which were excluded from previous returns. The Revenue Survey being incomplete in Sind, the exact area of that province is not known. The column shows the area of surveyed tracts *plus* the estimated area of unsurveyed tracts.

Column 4.—Returns are not available for villages which have not come under the operations of the Revenue Survey: therefore the areas of all unsurveyed villages are excluded by deduction in this column.

Column 5.—Includes, since 1893-94, the unsurveyed portion of the Upper Sind Frontier district into which settlement has been introduced.

Column 6.—The figures of column 5 are repeated because the areas in village papers are derived from the Revenue Survey records.

Bengal.

A comparatively small area has been cadastrally surveyed, and for this a separate return is prepared by the Local Government, which is not reproduced in these tables.

Columns 2 and 3.—Until 1893-94 inclusive the figures include only a portion of the areas of the Native States in the Orissa and Chota-Nagpur divisions, and exclude altogether the area of Kuch Behar and Hill Tippera. From 1894-95 Hill Tipperah, Sikhim, Kuch Behar, the tributary states of Orissa and the tributary states of Chota-Nagpur have been classed in a separate column (column 3) as Feudatory states.

Column 4.—Includes the unsurveyed area of the Angul and Khond Mahals, and certain unreclaimed portions of the Sundarban land in the 24-Parganas district. The area entered under the Chittagong district in the return for 1892-93 related to unsurveyed grants, unculturable hills, and jungles.

N.-W. Provs.

Column 4.—Includes the area of hill districts which possess no agency for collecting statistics.

Panjab.

Column 4.—Represents chiefly the area of unsurveyed tracts and the waste areas (other than forests) not included in village boundaries.

Central Provs.

Column 4.—Includes the unsurveyed areas of zamindari † estates and waste land grants.

Column 6.—The area for which accurate statistics are available is in these Provinces steadily increasing, and until the survey is complete and re-settlement finished there will always be changes which render comparison difficult.

Burma.

Column 2.—Where there has been no professional survey the best information available is accepted and is revised from time to time as surveys extend.

Column 3.—Includes Kanti and Thaungdut States (in the Upper Chindwin district) and Bawgada (in the Yamethin district).

Column 4.—Includes the unsurveyed hilly country inhabited by Kachins (Bamo district).

Assam.

Column 2.—In the return for 1893-94 the area of the unsurveyed mauzas of the Kámrúp district was estimated by planimeter: it has since been correctly ascertained.

---

* Except the portions of such tracts for which details of classification are available.

† In the Central Provinces the zamindars are those chiefs of minor importance (or their successors) who, while holding large and compact estates on privileged tenure, have been confined to the rank of ordinary subjects.

Assam—contd. *Column 4.*—Exhibits chiefly the area of wild hill tracts and of tracts permanently settled which possess no agency for the collection of statistics.

Berar. *Column 2.*—Shows the area as ascertained by the local Survey and Settlement Department.

Column 4.—The area shown in this column against the year 1892-93 was the unsurveyed tract of the Melghat Taluka which has since come under the operations of the local Survey and Settlement Department.

Coorg. *Column 6.*—The areas shown in this column are based on the old native bhattis—a measurement the extent of which varied with the quality of the soil,—but 100 bhattis roughly equal 3 acres.

Ajmere-Merwara. *Column 2.*—Shows the area as given in the Settlement records. Previous to 1890-91 the areas of privileged tenures known as jagir and istamrari villages were excluded from this column, while in 1890-91 jagir and minor istamrari areas were included, and from 1891-92 the entire area of the province has been shown.

Mysore. *Column 2.*—Shows the area ascertained by the local Survey and Settlement Department supplemented, for tracts for which survey areas have not yet been reported, by the areas given in the Revenue Accounts.

Column 4.—Exhibits the areas of inam villages for which no detailed returns exist.

TABLE A-2.

The first part of this section deals with the classification of the area shown in column 6 of section A-1 and gives the proportions — (columns 2 and 3) withdrawn from cultivation by inclusion under forests or for some other reason, (4) cultivable land available but not yet taken up, (5) land occupied but not under crop during the year of report, (6) the net area under crop, that is, after deduction of the area cropped more than once in the year. The second part (columns 8 to 13), which was first prescribed in 1884, gives the area irrigated from various sources, to which is added a statement of the distribution of the said area under various crops.

The headings which have undergone alteration since 1866, are noted below :—

	1866 I-A-1	1884 A	1891 A-2.
Cultivated		Actually cropped Current fallows	Net area cropped. Current fallows.
Culturable		Available for cultivation	Culturable waste other than fallow.
Unculturable		Not available for cultivation.	Not available for cultivation.
Unappropriated cultivable waste.		Omitted	Omitted.
Communications.		Ditto	Ditto.

Lands covered by water, roads, and railroads, which are separately shown in the form of 1866, are included in the column "not available for cultivation" in the forms of 1884 and 1891.

GENERAL NOTES.

Column 2.—"Forests" means in the returns of 1891 "any land classed or administered as forest under any legal enactment dealing with forests," and in those of 1894, all Government forests and forests administered under any Forest Act. Any cultivated areas which may exist within such forests may be excluded and shown in column 6 (net area cropped during the year), an explanation being given in a note.

Column 3.—Includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture.

Column 4.—Includes groves not classed in the cropped area.

Columns 8 to 13.—Show the area actually irrigated during the year, areas cropped more than once being counted once only.

Columns 14 to 18.—Show the gross area of irrigated crops, areas cropped more than once being counted as separate areas for each crop.

PROVINCIAL NOTES.

Madras.

Column 4.—The entire area of wholly inam villages of the Salem district was shown in this column previously to the return of 1892-93.

Column 5.—Includes all occupied waste, that is to say, waste portions of land for which revenue is paid. This column also includes since 1893-94 unoccupied lands in wholly inam villages of the Nellore district which were previously shown in columns 3 and 4, and current fallows in wholly inam villages of the North Arcot district.

Column 10.—The term "tanks" refers to a particular kind of dammed reservoirs. Previous to 1891-92 the area entered in this column was the gross, not the net, area irrigated, areas cropped more than once being added to the net area.

Bombay.

Column 2.—Includes land administered by the Forest Department whether formally declared forest under an Act or not.

Column 3.—Includes all land recorded at the Survey and Settlement as unculturable, though at times parts of this land are cultivated.

Column 5.—The maximum period for which land thrown out of cultivation is reckoned as fallow is ten years.

Column 9.—The figures given for private canals, tanks, wells, and other sources are rough estimates. Previous to 1892-93 figures for private canals were included in "Government canals" and those for tanks and wells in "Other sources."

Column 16.—By "miscellaneous food crops" is understood the crops entered in Table A-3 as sugar, orchards and garden produce, and miscellaneous food crops.

Bengal.

Column 2.—Shows Government forests under the administration of the Forest Department and those administered by the Deputy Commissioner of the Sonthal Parganas under Act VII of 1865.

Columns 3 and 4.—Include private forests.

Columns 8 to 18.—Irrigation statistics are not available except for the area irrigated from Government canals.

N.-W. Provs.

Column 6.—The maximum period for which land left untilled is reckoned as fallow is three years.

Columns 8 to 13.—Figures for "Government canals" include those for "private canals," and those for "other sources" included tank irrigation until 1892-93. From 1893-94 separate figures for tank irrigation have been supplied. There are very few private canals in the North-Western Provinces.

Panjab.

Column 2.—Includes from 1884-85 to 1891-92 all lands specially devoted to forest growth under the control of Government or any local Board or Municipality.

Column 4.—Includes large areas of Government waste not allotted for cultivation.

Column 5.—The maximum period for which land is reckoned as fallow is two years, but the change in classification is not generally made until the year for quadrennial statements comes round, and so the old classification may be kept up from one to three years longer than the prescribed period. In certain districts in the south-west of the province, however, the classification of land is annually amended.

Columns 8 to 18.—Show gross area irrigated, that is, land irrigated in both seasons is counted twice.

Central Provs.

Column 3.—Shows areas covered with water, hill, or rock, and land occupied by buildings and roads.

Column 4.—Shows (1) the area and waste within holdings (including fallows of more than three years), (2) land under tree forest which is not administered under any Act dealing with forests, (3) land under scrub jungle or grass, and (4) groves not included in holdings.

Column 5.—Land which has been fallow for a period not exceeding three years is reckoned as current fallow.

Burma.

Column 2.—The area shown in this column is that given in the Forest Administration Report, and includes reserved, and in Thayetmyo, village forests, but not protected forests.

Column 3.—In 'settled' tracts the unculturable area is taken from the registers, but in 'unsettled' tracts it is obtained from the best source available.

Column 4.—Includes land thrown out of cultivation and abandoned.

Column 5.—Includes only such land left uncultivated as is actually in possession of cultivators and subject to assessment.

Columns 14 to 18.—Includes only crops actually irrigated, for instance where an unirrigated crop of sesamum is taken off land which is afterwards irrigated and planted with paddy, the area grown with sesamum is not included in this column. There is no irrigated area growing more than one crop in Lower Burma.

Assam.

Column 2.—In this province "forests" used formerly to include protected and reserved forests. Since 1893-94 reserved forests only have been shown; protected forests, now being included in "unclassed State forests," are not recognised as a special class under the Assam Forest Regulation.

Columns 3 and 4.—Separate figures for these columns cannot be given for the districts of Cachar, Sylhet, and the Khási and Jaintiá hills until the areas to which they refer have been surveyed.

Column 5.—Includes generally all lands which are thrown out of cultivation or not cultivated, but remain in the occupation of leaseholders. For the hill districts no figures can be given except for tea estates in the Khási and Jaintiá hills; and in the Surma valley, which is mostly permanently settled, figures are available only to show the uncultivated portion of tea estates and of settled estates in the area cadastrally surveyed.

Columns 8 to 18.—There is practically no artificial irrigation. The small area irrigated from hill streams has never been distinguished from other cultivation.

Berar.

Column 2.—Includes the forest area administered by the Forest Department.

Column 3.—Includes village sites, and land taken up for public purposes or devoted to uses other than agriculture; it also includes unculturable portions of culturable fields.

Column 4.—Includes land available for cultivation but not given out; but in the Wun district land given out for cultivation but not cultivated by the occupant was included in the return until 1895, when the error was corrected.

Column 5.—Includes occupied culturable land left fallow for private reasons, such as grazing, rotation, etc.

Coorg.

Columns 8 to 13.—Figures for land partly irrigated from springs and mountain streams are not available.

Ajmere-Merwara.

Column 2.—The forest area exhibited in the returns previous to 1890-91 relates to khalsa or Government villages only, and that shown in the returns for 1890-91 to khalsa, jagir, and minor istamrari villages.

Manpur.

Column 2.—Includes barren land.

Mysore.

Column 3.—Includes not only lands absolutely unfit for cultivation, but also lands reserved for pasture, and plantations intended for public use and therefore left unassessed. A large portion of the pasture lands is fit for cultivation, and is given out for cultivation from time to time under special orders, such lands when given out for cultivation being transferred from column 3 to 5 or 6 as the case may be.

Column 5.—There is no system of fallows in this province, that is, lands are not systematically left uncultivated for the purpose of giving them rest. Individuals occupy large areas and pay full assessment thereon, leaving portions uncultivated, generally for the use of their cattle. For the purposes of account the difference between the areas of the lands occupied by individuals and of those actually cultivated by them is shown as fallows. The lands occupied and assessed are sometimes unfit for cultivation, having been taken up on full assessment merely for use as pasture; but the exact area of such lands cannot be ascertained, though it cannot be large.

Columns 8 to 18.—Formerly these columns included areas in some districts occupied but not cultivated. The error was rectified in the return for 1893-94.

TABLE A-3.

The third section of Table A shows the gross cultivated area under each crop, irrespective of irrigation and double-cropping, the area under the latter

being included in the statement, but subtracted in column 37. The area dealt with is that shown in column 6 of section A-2.

The headings which have undergone alteration since 1866 are shown below :—

1866 III-D-1.	1884 B.	1891 A-3.
Other food-grains	Other food-grains, including pulses.	Barley. Cholam or jawar. Cambu or bajra. Ragi or marua. Maize (seed). Gram. Other food-grains, including pulses.
Oilseeds	Oilseeds	Linseed. Til or jinjili. Others.
Sugar	Sugarcane	Sugarcane. Others.
Fibres	Jute Others	Jute. Others.
Vegetables	Omitted	Omitted.
Opium	Ditto	Opium.
	Chinchona	Chinchona.

The following items were added in 1891 :—

Condiments and spices.	Other drugs and narcotics.
Other dyes.	Fodder crops.
Indian hemp.	Orchards and garden produce.

GENERAL NOTES.

In cases where two or more crops are grown together, an estimate is made of the area covered by each, and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulæ prescribed by the provincial authorities.

The crops selected for inclusion in columns 10, 13, 16, 19, 23, 30, 33, and 34 are determined by the provincial authorities.

PROVINCIAL NOTES.

Madras.

Column 10.—Includes all miscellaneous food-crops which elsewhere are shown in columns 33 and 34.

Column 31.—Shows the areas sown with grass and crops raised solely for purposes of fodder. Lands left waste for grazing purposes and on which grass grows spontaneously are not included in this column.

Bombay.

Column 32.—Includes green fodder for cattle.

Bengal.

As no returns are at present prepared by village or circle officers, the figures shown in this table are only estimates, except those given for the Chittagong district. The figures shown against the heads "orchards and garden produce" and "miscellaneous food and non-food crops" are not complete.

N.-W. Provs. and Oudh.

In these provinces the area sown with mixed crops, for which no separate heading is provided in the provincial crop statements, is assigned to the principal crop.

In the case of the Almora district no statistics of crops other than tea and Indian hemp are available.

Central Provs.

Column 32.—Includes groves situated within the home farm of the landlord or the holding of a tenant.

Assam. This table shows only the area under tea cultivation in Cachar and the Khási and Jaintiá hills. In the case of Sylhet the area under crops other than tea is available only for the cadastrally surveyed tracts, and the information has for the first time been given in the return for 1893-94. The cropped areas shown under the five upper districts of the Assam valley relate to the tracts cadastrally surveyed, and to the *khiraj* lands and the tea estates not cadastrally surveyed. In the case of the Garo and Naga hills districts the areas under different crops are available for the plain tracts only, and were shown for the first time in the return for 1893-94.

Column 32.—Includes area occupied by village sites.

Columns 33 and 34.—Separate figures for miscellaneous food and non-food crops are not available for the Goalpara, Nowgong, and Lakhimpur districts.

Berar. *Column 36.*—No information about double-cropped areas was available in the years previous to 1894-95.

Coorg. *Column 28.*—There are no separate chinchona plantations in Coorg, the plant being grown among the coffee in coffee estates. The area shown is therefore an estimate of that actually occupied by chinchona.

Ajmere-Merwara. The cropped area exhibited in the returns previous to 1890-91 related to khalsa or Government villages only, and that shown in the return for 1890-91 to khalsa, jagir, and minor istamrari villages. The whole of the cropped area in the province has been shown since 1891-92.

TABLE A-4.

This table deals with agricultural stock. The headings of the form now in use differ from those of 1866 and 1884 in the following respects:—

1866 III-D-2.	1884 III-D-2.	1891 A-4.
Cows and bullocks	Cows and bullocks	Bulls and bullocks. Cows.
.....	Buffaloes	Male buffaloes. Cow buffaloes.
.....	.....	Young stock (calves and buffalo calves).
Horses Ponies	Horses and ponies	Horses and ponies.
Donkeys	Mules and donkeys	Mules and donkeys.
Sheep and goats	Sheep and goats	Sheep. Goats.
.....	.....	Camels.

GENERAL NOTES.

The figures given in this return are believed to be on the whole less accurate than those contained in the other returns of agricultural statistics. In some provinces they include, and in others they exclude, animals in towns, cities and cantonments.

The headings, prescribed in 1891, were not fully adopted until 1891-92, when all the provinces furnishing the figures, except the Panjab, Assam and Berar, supplied them in the prescribed form; in 1892-93 the returns of these provinces also were made uniform with the rest.

PROVINCIAL NOTES.

Madras. Statistics for wholly inam villages in all districts, except Nellore and Salem, were for the first time included in the return for 1893-94, but the figures are not very accurate. Previous to 1884 it was the practice in Madras to take a stock census every five years. A census of cattle in Government villages is now taken annually through the agency of village officers and checked by superior revenue officers: this is done in the last week of October in most districts and in the first week of May in others. The results are entered in a special statement (form 21, Section II of the Village Manual of Accounts) maintained in each village, and are thence tabulated for each taluk and district. In inam villages, however, no suitable

agency is available for the work, and Collectors obtain information for these villages as best they can: it is not known to what extent any census is made in them. No information regarding live stock in permanently settled estates is available for inclusion in the return. Figures for zamindari villages are not yet available.

The figures in the return down to 1893-94 did not include live stock in some portions of Trichinopoly town and cantonment not forming part of any revenue village, and in one town of Madura and one cantonment of Ganjam. Instructions were subsequently issued to the Collectors of these districts to enumerate the stock and include the figures in the return.

The table includes stock statistics of all towns and cantonments except those in zamindaris, and those which do not form part of any revenue village and in which the statistics are not collected because there is no agency for the purpose.

Column 6.—Cattle under four years of age are classed as young stock.

Bombay. The figures of live stock are annually collected by village officers at a house to house enquiry in June, in the manner directed in village form 13 of the Revenue Manual. The figures are regularly tested by circle inspectors (Kanungos). Stock statistics are not collected in the city of Bombay. Figures for the towns of Ahmadabad and Surat were returned for the first time in 1890-91. No age has been fixed below which cattle are classed as young stock. The young of cows and buffaloes not old enough for work or to produce young, are classed as young stock.

Columns 10 and 11.—In 1891-92 arrangements were made for the registration of mules, donkeys, and camels in all districts. Formerly statistics were collected only from districts where these animals were numerous.

Sind. The figures entered in the general table exclude Sind, for which province no statistics of live stock have yet been collected, though endeavours have been made to obtain particulars. The difficulties attending the enumeration are numerous, and the returns supplied are unsatisfactory. The Commissioner is taking steps to remedy the deficiencies.

Bengal. Live stock statistics are not collected at present, except from the tracts where surveys are being made or a record of rights prepared.

N.-W. Provs. and Oudh. The figures of live stock are obtained by an annual census made by the patwari at the time he makes his round for the record of the spring crops. A rough record of the detail for each tenant is made by the patwari and tested from time to time by the kanungo. The resultant totals are preserved in the patwari papers. The figures do not include, as a rule, the stock in cities, large towns, and cantonments. There are, however, some cantonments in which patwaris' papers are kept and for which stock statistics are returned. No age has been fixed below which cattle are classed as young stock.

Panjab. The return is based on figures furnished by patwaris. These officials make an enumeration of the cattle in a village every fourth year when a detailed jamabandi is prepared. The enumeration is not made on a particular day, but whenever the patwari finds time to do so. The result is that in a fourth of a district, in a fourth of the Province in other words, enumeration of cattle is made every year, and the fresh figures for that fourth part are incorporated in the annual return by subtracting from the preceding year's figures the old statistics and adding the fresh ones.

Cantonments do not form part of any patwari circle: therefore the return excludes stock in cantonments, except those in Peshawar and Lahore, where special arrangements have been made with cantonment authorities for the figures. Cattle in the Hissar farm are not included as that area is not within any patwari circle. Cattle in smaller towns and large cities are included, excepting those in the cities of Delhi, Dera Ghazi Khan, Ambala, Montgomery and in the towns of Kangra and Multan.

Cattle up to two years of age are classed as young stock.

Ploughs are considered to mean "ploughs at work," that is, ploughs provided with a yoke of plough oxen.

Central Provs. No stock statistics were received from these provinces until after 1891-92 and those furnished in 1892-93 related to 13 districts only. No statistics were collected for the Mandla district during 1893-94 and those given for the Balaghat district relate to 73 patwari circles only. The figures are collected annually (no particular date fixed) by the patwaris for the areas in their charge, in the form of appendices to the *milan khasra*. The total of the return is recorded in the tahsil by the kanungo in a village register. In some districts stock in towns and cities are included, in others they are not. Cantonments are not included within any patwari circle, and therefore no figures are returned from them.

Young oxen, if actually on work, are classed under the head "bulls and bullocks." Heifers which have not reached the usual calving age are excluded from the class "cows."

Burma. The figures of live stock in Lower and Upper Burma are collected by thugyis or headmen when preparing the capitation tax rolls, or when required for the return. Cattle are not counted on any particular day. The figures include all animals in towns and also those employed in each district by Government and Departments such as Transport, Military, Police, and Municipalities. "Young stock" includes all animals up to three years of age.

Assam. Stock statistics for the six Assam valley districts were received for the first time in 1890-91, and for all the districts, except Cachar and the Khasi and Jaintia Hills, in 1893-94. The figures entered under the Naga hills in the last-mentioned year related to Barpathar and Eastern Rengma mauzas as far as *patta* land is concerned. The return for 1894-95 contains figures for all the districts except the Khasi and Jaintia Hills, from which it has not been found possible yet to obtain any statistics of stock.

Figures of live stock are collected each year shortly before the time when the return is submitted by the district officers. The necessary information is collected in manner prescribed in Circular 18, dated the 27th April 1894, by the mandals and tabulated for each mandal's circle, after which the figures are totalled for each mauza and tahsil, and then for the district. The stock in towns, cities, and cantonments are included, except in two or three districts.

No age has been fixed below which cattle are classed as young stock. In some districts calves below three years are so classed; in some the age limit is below one or two years, and in others calves not weaned are shown as young stock.

Berar. A census of the cattle in each district is taken once a year, though not on any particular date, by the village officials, and the figures are checked by munsarims and tahsildars. Table A-4 is based on the results of that census, and include, in the case of the Akola district, cattle in towns and cantonments. Calves under two years are classed as young stock.

Coorg. No census of live stock is taken on any particular day. The parpattigars at the time of the yearly jamabandi ascertain from the village headmen and ryots the number of cattle possessed by each ryot, and enter the particulars in each ryot's account, a copy of which is sent to the Commissioner's office. European planters are also called on to furnish every year a return of cattle in their estates. Table A-4 is compiled from all the information so derived.

Animals in municipal towns are included. Calves under three years of age are classed as young stock.

Ajmere-Merwara. The return does not include stock in towns and cantonments. Calves under three years of age are classed as young stock.

Manpur. An annual census of live stock is taken on the 15th March.

Mysore. No census of live stock is taken, but the statistics are collected every year by the shanbogue and patel of each village by enquiry or inspection just before the taluk jamabandi, and recorded in the village account.

TABLE C.

This table indicates the relation between area, population, and land revenue, or in other words, it shows the mean burden of the State assessment on the land assessed to it and on the community at large. It was first prescribed in 1884, and was revised in 1893. Similar information previous to 1884 is to be found in Tables I-D, I-E-2, and 1-E-6, etc., appended to the General Administration Reports.

The two main classes of tenure, (1) ryotwari and (2) zamindari and village communities, specified in 1884, were not exhaustive, and the provincial administrations were allowed to make additions to these two classes in accordance with local requirements. The general table now shows all tenures under one or other of three heads, namely (1) ryotwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled).

The present form differs from that prescribed in 1884 in the following respects :—

1884.	1893.
Column 1.—(1) Ryotwari . . . (2) Zamindari and village communities.	(1) Ryotwari. (2) Zamindari and village communities (temporarily settled). (3) Zamindari (permanently settled).
Column 3.—Deduct area not fully assessed, including estates assessed at privileged rates.	Deduct (*a*) Area not fully assessed. (*b*) Area for which returns required for this table are not available.
Column 4.—Balance of area fully assessed	Balance, that is fully assessed area for which returns are available. (*a*) Total. (*b*) Cultivated.

GENERAL NOTES.

The instructions appended to the form of 1884 prescribed that in column 1 the ryotwari area of Bombay, Madras, and Assam should be shown separately from the other areas of those

provinces; that a similar distinction should be made between the zamindari and khalsa areas of the Central Provinces, and between the zamindari and Government estates of Bengal; that column 2 should be column 2 of Form A, less column 3 of that form; that small revenue-free plots for which details are not forthcoming need not be included in column 3, and that columns 11 and 12 might be left blank if the information was not obtainable.

In July 1893 these instructions were somewhat modified and the following rules were prescribed:—

Column 1.—The varieties of tenure shown should be included, as far as possible, under one or other of the following, namely (1) ryotwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled).

Column 3 (a).—Areas held revenue-free or at privileged rates should be deducted, but the deduction need not be made where such areas are in any case less than an entire village, and where there is any difficulty in estimating the corresponding deduction to be made in the population (column 11). In the Madras, Bombay, and Berar returns all land on which a full assessment has not been leviable during the year (for instance, assessed unoccupied land) should be classed for the purposes of this column as "area not fully assessed." Areas should not be entered in this column merely because the assessment due from them has been suspended or remitted on account of short crops, or for other special reasons.

Column 4.—This column should be subdivided into 4 (*a*) total fully assessed area for which returns are available, and 4 (*b*) area cultivated out of the area given in column 4 (*a*). The latter column should be equal to the former after deducting current fallows and fully assessed waste. In the (general consolidated) return these sub-heads are not shown for want of convenient space. In the Presidency Proper of Bombay the occupied area may be taken as equivalent to the cultivated area.

Column 5.—Where the land revenue includes the zamindar's share, the net receipts should be entered, and the return should show the payments due by the zamindars to Government, not those due by ryots to the zamindars. The actual realisable demand for the year should be entered, after excluding arrears for past years. Sums remitted on account of unoccupied lands, short crops, etc., should be excluded. Land revenue in this column includes miscellaneous land revenue.

Column 8.—As in column 5, but miscellaneous land revenue and land revenue on areas not fully assessed to be excluded.

Column 9.—To be column 8, divided by column 4 (*a*).

Column 10.—To be column 8, divided by column 4 (*b*).

Areas under forest are included in column 2 under the prevailing tenure of the province.

The population in column 6 is that of the last general census.

The year to which the provincial returns relate ends on different dates in different provinces; in Madras, Ajmere-Merwara, and Mysore the year ends on 30th June, in Bombay on 31st July, in Bengal, Upper Burma, Lower Burma, Assam, Berar, Coorg, and Manpur on 31st March, in the North-Western Provinces, Oudh, and the Panjab on 30th September, and in the Central Provinces on 31st May.

PROVINCIAL NOTES.

Madras.

Column 3 (a).—In the case of *ryotwari* tracts this column shows the area of unoccupied assessed lands, of minor inam lands in Government villages held rent-free or subject to quit-rent, and of all unassessed poramboke and forest lands; and in the case of *zamindari* tracts the areas of hills, porambokes, and minor inams are shown. The entire area of wholly inam villages is deducted in this column.

Column 3 (b).—*Ryotwari;* includes the area of Agency tracts.

Column 4.—*Ryotwari;* shows the total occupied area.

Column 5.—*Ryotwari;* shows the net land revenue demand, excluding remissions and deductions, but including quit-rent on minor inams and miscellaneous revenue pertaining to land, and also water-tax.

In the case of *zamindari* and wholly inam villages, this column shows *peshkash* or quit-rent payable to Government, together with water-rate on lands included in such tracts, as also jodi or quit-rent on minor inams situated therein.

Column 8.—*Ryotwari;* shows the net land revenue demand, excluding remissions and deductions and revenue from minor inams (quit-rent and water-tax). In the case of *zamindari* this column shows *peshkash* or quit-rent payable to Government, excluding the jodi or quit-rent and water-rate on minor inams.

In the returns for the year 1892-93 and for the previous years, the figures in column 8 against *ryotwari* are in some districts greater than those in column 5. This is due to the fact that the entry in column 5 included quit-rent on minor inams, water-rate, and other miscellaneous land revenue; while column 8 showed the assessment on the fully assessed area, both occupied and unoccupied. Where the fully assessed unoccupied area is large, or the miscellaneous revenue included in column 5 is small, the revenue in column 8 is generally in excess of that in column 5.

Column 10.—The cultivated area referred to in this column is in the case of *ryotwari* lands the total area cropped out of the area given in column 4. The corresponding information is not available for the *zamindari* area. Previous to 1893-94 the occupied area was for the purpose of this return taken as equivalent to the cultivated area.

Column 11.—Shows the entire population of *ryotwari* and *zamindari* villages, respectively.

Bombay.

Column 1.—Lands held under special tenures, such as (1) talukdari, mehwasi, udhad-jamabandi, narvadari, and bhagdari in Gujrat, and khoti and izafat in the Konkan, which were shown under separate heads in the previous returns, have been classed as "zamindari and village communities (temporarily settled)" in the returns from 1892-93.

Column 3(a).—Includes alienated area and the area held free of revenue or the revenue of which has been reduced by special agreement, and the fully assessed unoccupied area since 1893-94.

Column 3(b).—Includes land not available for cultivation or unassessed.

Column 4.—Includes land under temporary cultivation; also pôt inams paying full assessment. The fully assessed unoccupied area, which was formerly included in this column, has been deducted in column 3(*a*) since 1893-94.

Column 5.—Shows net receipts on account of the land, including quit-rent and miscellaneous land revenue.

Column 8.—The assessment on the fully assessed unoccupied area, which was previously included in this column, has been excluded since 1893-94.

Column 10.—The incidence is calculated from the occupied area, which, in the Presidency Proper, is treated as the cultivated area for the purposes of this table, and the assessment on that area.

Column 11.—Includes population of pôt inams and the like scattered areas which cannot be distinguished from the population of the fully assessed area. The population of the fully assessed portion of zamindari estates has been included since 1893-94.

Column 12.—The incidence is based on the figures given in column 11 and those in column 8, *plus* the amount of full assessment on privileged lands held in fully assessed villages at less than that assessment. Previous to 1893-94 miscellaneous land revenue was included in the calculation.

Sind.

Column 3(a).—Includes fallows from 1892-93 and fully assessed unoccupied area from 1893-94. Formerly these were included in column 4.

Column 4.—Excludes fallows and the fully assessed unoccupied area (*vide* note to column 3(*a*)). In Sind fallows are assessed once in five years.

Column 5.—Includes revenue from alienated area.

Column 8.—The assessment on the fully assessed unoccupied area, which was previously included in this column, has been excluded from 1893-94, and that on fallows has ceased to be shown in it from 1891-92.

Column 10.—The incidence is calculated from the cultivated area, excluding fallows, and the assessment on that area.

Bengal.

The table is prepared once in five years for this province, the greater part of which is permanently settled. The figures for 1892-93 have therefore been reproduced in the return for 1893-94.

Column 1—Zamindari (permanently settled).—Includes estates managed for proprietors by Government.

Zamindari (temporarily settled).—Includes (*a*) all temporarily settled estates, namely, those settled for periods with proprietors, and private estates leased to farmers for periods; and (*b*) all estates owned by Government as proprietor.

The classification of estates adopted in the returns since 1892-93 is (1) zamindari and (2) Government estates.

Column 2.—Shows the area of estates borne on the revenue roll of the district, whether wholly situated within the district boundaries or not, and does not include lands of estates partly situated within the district boundaries but borne on the revenue roll of another district. This accounts for the discrepancy between the district areas shown in this column and those shown in table A-1.

N.-W. Provs. and Oudh.

The return for the North-Western Provinces is quinquennial The revision of the statistics is not, however, relegated to a single year, but is gradually carried out in one village one year and in an other the next year during the whole period of five years.

Column 3 (a).—Does not include small revenue-free plots, for which details are not forthcoming.

Column 10.—The cultivated area referred to in this column is the cropped portion of the fully assessed area, but previous to 1892-93 it included current fallows.

Column 11.—Includes population of revenue-free lands. The inclusion does not materially affect the incidence shown in column 12.

No figures have been shown in columns 8 to 13 opposite "Lucknow, permanently settled" as no portion of the permanently-settled area has been fully assessed to land revenue.

Panjab.

Columns 3 (a) and 3 (b).—Include villages receiving frontier remissions, tracts which are entirely unassessed (such as the Kulu mountains) and istamrári tenures.

Column 5.—Includes assigned revenue.

Column 10.—The cultivated area referred to in this column in the return for 1892-93 and former years included current fallows, except in certain districts in the south-west of the province, mostly under fluctuating assessment. The cultivated area taken for calculating the incidence since 1893-94 is exclusive of current fallows.

Central Provs.

Column 1.—Previous to 1890-91 the entire area of the province was classed as khâlsa or zamindari.

Column 2.—Exhibits the area by village papers (column 4 of table A-1) *plus* the area for which no returns exist (column 2 (*b*) of the same table). Previous to 1890-91 it showed the area entered in column 1 of table A-1, less Feudatory and Tributary estates.

Column 3 (*a*).—Zamindari estates properly so-called (that is, excluding malguzari) are classed as not fully assessed, but in the returns for 1889-90 and 1890-91 they were classed partly as fully assessed and partly as not fully assessed, and previous to 1889-90 the entire area of such estates was exhibited as fully assessed.

Column 10.—The cultivated area referred to in this column includes fallows. Since 1894-95 the net cropped fully assessed area has been taken in calculating the incidence.

Upper Burma.

Column 3 (*a*).—The only areas in Upper Burma classed as zamindari are special grants made on the terms given in Appendix I of the Rules under the Upper Burma Land and Revenue Regulation.

Column 3 (*b*).—Includes non-State lands which are at present assessed in the form of thathameda (house-tax).

Column 4.—Shows only assessed State lands.

Column 5.—Includes thathameda (house-tax), water-rate, revenue from State land, and miscellaneous land revenue, but excludes remissions under these heads.

Column 8.—Shows only the land revenue demand realised on the fully assessed area entered in column 4.

Column 10.—The cultivated area referred to in this column is the total assessed area shown in column 4, as fallows in Upper Burma are not assessed. The incidences given in columns 9 and 10 are therefore the same.

Column 11.—The population of villages and kwins is considered as belonging to fully or not fully assessed area accordingly as the greater portion of the village or kwin lands are or are not fully assessed.

Lower Burma.

Column 1.—Grants under the waste land rules of Pegu and Arakan and Lord Canning's rules, and grants of large areas made under special conditions, are classed as zamindari (temporarily settled).

Column 3 (*a*).—Excludes settled circles in which temporary reductions of the maximum rates of assessments have been sanctioned, but includes the areas described in the note to column 1 except areas granted under special conditions on which the full revenue rates are assessed.

Column 3 (*b*).—Includes all areas other than those assessed either fully or not fully.

Column 4.—Includes current fallows.

Column 5.—Shows the actual demand on the land assessed, including miscellaneous land revenue, but excludes remissions granted.

Column 8.—Shows the actual demand on the land assessed, excluding miscellaneous land-revenue.

Assam.

Column 1.—Waste land grants held on progressive assessment are now included under the head "zamindari (temporarily settled)," but previous to 1892-93 such grants were shown under a separate head, except in 1890-91, in which year these as well as Government wastes and forests were included under the head "zamindari and village communities." In the return for 1893-94 forest area has been included under ryotwari tenure.

Column 5.—Includes the entire revenue of the Garo Hills, that is, the portion paid to zamindars as well as the Government share in it.

Column 6.—Includes the population of the feudatory estates in the Khâsi and Jaintiâ hills.

Column 10.—The incidence has not hitherto been calculated on the same principle each year. For instance, in 1886-87, 1887-88, and 1890-91 the calculation was based on the actually cropped area shown in column 5 of Table A-3 and the revenue shown in column 8 of Table C. In 1888-89 and 1889-90 the incidence in some districts was returned at the same figure as in column 9. Since 1893-94 uniformity has been maintained in this respect, the incidence being calculated on the cultivated portion of fully assessed area. The cultivated area in the zamindari permanently settled estates in Sylhet and Goalpára not being known, the rates of incidence cannot be given for these estates.

Berar.

Column 2.—The figures for 1891-92 and 1893-94 are the area according to village papers; those for 1892-93 are the area according to professional survey.

Column 3 (*a*).—This column shows jagir, izara, and palampat villages, all unassessed land, forest areas, village sites, roads, rivers, etc., but it has not hitherto been filled up uniformly in all districts: in some the entire area of the district *minus* the occupied and unoccupied areas of khalsa villages has been included, in some the unoccupied area of villages settled under waste land rules has been excluded, while in others the whole of the occupied and unoccupied area of the district has been excluded.

Column 4.—Includes land assessed but not occupied during the year, and potkhrab land.

Column 5.—The survey assessment of jagir villages is included in the Akola district, while in the Bassein district the quit-rent of such villages appears to be taken.

Column 8.—Includes assessment on unoccupied land, but, like column 3 (*a*), this column does not represent the same statistical facts for all districts in the returns for previous years.

Column 10.—The incidence has not hitherto been calculated on the same method each year. For instance, in 1884-85 and 1890-91 to 1892-93 the incidence was based on the actually cropped area and the assessment on the occupied and unoccupied area, and in 1885-86 and 1888-89, it was calculated on the assessed occupied area and the assessment thereon; while in 1886-87, 1887-88, and 1889-90 the calculation was based on the assessed occupied and unoccupied area and the assessment thereon. The incidence since 1893-94 has been calculated on the net cropped area shown in column 5 of Table A-2.

Column 11.—Excludes population of jagir and izara villages.

Coorg.

Column 3.—Includes bané and cardamom lands.

Ajmere-Merwara.

Column 1.—From 1886-87 to 1889-90 the khalsa (revenue-paying) area was classed as "zamindari and village communities" and from 1890-91 to 1892-93 as "ryotwari." From 1890-91 to 1892-93 jagir and minor istamrári areas, and from 1891-92 large istamrari areas were classed as zamindari. Since 1893-94 the khalsa area has been classed as "zamindari and village communities (temporarily settled)" and the jagir and istamrári areas as "zamindari (permanently settled)".

Column 2.—The area shown from 1886-87 to 1889-90 related to khalsa land only, and that shown in 1890-91 included jagir and minor istamrári villages. Since 1892-93 the entire area of the province has been shown.

Columns 3(a) and 3(b).—Jagir villages have been shown as deductions in these columns since 1890-91.

Column 4.—Includes in the case of the khalsa villages the assessed cultivated area including assessed fallows. The minor istamrári area was shown as not fully assessed in 1890-91 and 1891-92 and the large istamrári area was shown as such in 1891-92. The whole of the istamrári area, which is now returned as "zamindari (permanently settled)," has been shown as fully assessed since 1892-93.

Column 8.—The return for 1890-91 included the land revenue of minor istamrári villages, and for 1891-92 and 1892-93 the revenue of both large and minor istamrári villages.

Column 10.—The cultivated area referred to in this column is in the case of "zamindari (temporarily settled)," the cropped portion of the fully assessed area.

Column 11.—Excludes population of jagir villages, but the population of such villages was included in the returns for 1890-91 and 1891-92. The population of large istamrári villages was excluded from the returns for 1890-91, but included in the subsequent returns.

Manpur.

Column 6.—Includes since 1893-94 the population of jagir villages which was previously omitted.

Column 11.—Excludes population of jagir villages.

Mysore.

Column 4.—Shows all lands assessed by the Survey Department, whether such lands are under the occupation of ryots or not, and whether full assessment on the lands is leviable from the ryots during the year or not. Minor inams (that is, inams less than an entire village) fully assessed by the Survey Department, but which are held rent-free or pay only favourable rates known as quit-rents, are included in this column.

TABLE D.

This table shows the principal varieties of tenure held direct from Government. Owing to the great diversity of tenures the form is not perfectly adapted to the conditions existing in every province, but it was thought desirable to prescribe a form for general adoption in order to admit of the compilation of an abstract for the whole of India to complete the series of consolidated tables embodied in the Agricultural Statistics. The classification finally selected in 1891 was therefore of the most general description possible, but the difficulties experienced in some provinces in moulding their statistics to the prescribed classification have not yet been wholly surmounted, and so far it has not been possible to compile a consolidated return for all India.

For the years previous to 1884-85, in which year the collection of Agricultural Statistics for British India was first published, information regarding the varieties of tenure held direct from Government is to be found in Table I.-E.-3

appended to the General Administration Reports. The form was suggested by the Statistical Committee of 1866, was revised in 1884, and again revised in 1891.

The modifications introduced in the form since 1866 are noted below:—

1866. I.-E.-3.	1884. I.-E.3.	1891. D.
COLUMN 1.	**COLUMN 1.**	**COLUMN 1.**
1. Great zamindaris paying more than ₹50,000 revenue. — Held by individuals under law of primogeniture. — Held by individuals and families under ordinary law.	1. No alteration.	1. Revenue payers paying more than ₹50,000 revenue. — (*a*) Individuals under law of primogeniture. (*b*) Individuals and families under ordinary law. (*c*) Village communities.
2. Large zamindaris paying more than ₹5,000 revenue. — Under law of primogeniture. Under ordinary law.	2. Large zamindaris paying from ₹50,000 to ₹5,000 revenue. — Under law of primogeniture. Under ordinary law.	2. Revenue payers paying from ₹50,000 to ₹5,000 revenue. — (*a*) Individuals under law of primogeniture. (*b*) Individuals and families under ordinary law. (*c*) Village communities.
3. Small zamindaris other than those of cultivating communities.	3. Zamindaris paying from ₹5,000 to ₹100 revenue.	3. Revenue payers paying from ₹5,000 to ₹100 revenue. — (*a*) Individuals under law of primogeniture. (*b*) Individuals and families under ordinary law. (*c*) Village communities.
4. Proprietary cultivating communities paying in common.	4. Small zamindaris other than those of cultivating communities paying less than ₹100 revenue.	4. Revenue payers paying less than ₹100 revenue. — (*a*) Individuals under law of primogeniture. (*b*) Individuals and families under ordinary law. (*c*) Village communities.
5. Proprietary cultivators paying separately, including all small estates paying less than ₹100.	5. Peasant proprietors paying separately.	5. Peasant proprietors paying separately.
6. Holders of revenue-free tenures. — In perpetuity. For life.	6. Holders of wholly or partly revenue-free tenures. — In perpetuity. For life or lives.	6. Holders of wholly or partly revenue-free tenures. — In perpetuity. For life or lives.
COLUMN 8.	**COLUMN 8.**	**COLUMN 8.**
Revenue rate per acre.	Revenue rate per acre.	Omitted.
COLUMN 9.	**COLUMN 9.**	**COLUMN 9.**
Supposed net profit per acre.	Omitted.	Omitted.

GENERAL NOTES.

Class 5.—'Peasant proprietors paying separately.' This class is intended to represent the occupants of ryotwari lands only.

Class 6.—"Holders of wholly or partly revenue-free tenures" includes inamdars and jagirdars. The local Governments are at liberty to sub-divide the minor head "In perpetuity" of this class so as to distinguish between grants (*a*) absolutely and (*b*) conditionally held in perpetuity.

Column 2.—The number of estates shown in this column represents the number of separate estates recorded on the Land Revenue Registers.

Column 3.—A village is often shown more than once in this column when it contains or consists of parts of two or more estates separately assessed.

Column 4.—One proprietor holding land in two or more villages is entered twice or oftener, according to the number of settlements made with him.

The totalling of the return has been abandoned since 1891-92 as misleading, owing to the double entries in certain columns, such as column 3, in which a village is often shown more than once.

In March 1892 the words "Other than those of cultivating communities" were omitted from the fourth class of tenure in the prescribed form of 1891, in order to admit of such communities being classed under heading 4 (*c*) of this class.

The year to which the returns relate ends on different dates in different provinces: in Madras, Bombay, Bengal, Upper Burma, Lower Burma, Assam, Berar, Coorg, and Manpur the year ends on 31st March, in the North-Western Provinces, Oudh, and the Panjab on 30th September, and in Ajmere-Merwara and Mysore on 30th June.

PROVINCIAL NOTES.

Madras. This table is prepared quinquennially, the variations in the entries from year to year not being great. The table prepared for 1891-92 has therefore been reproduced since that year.

Zamindaris, mittas, palayams, etc., are included in the first four classes; all ryotwar holdings are included in class 5; inams, shrotriems, etc., are included in class 6; inams as well as ryotwari lands on which the quit-rent has been redeemed are included in class 7; renters of estates in the Vizagapatam district, and lease-holders of gold mines in the Nilgiri district are included in class 9, "Others."

Column 5.—Includes waste and poramboke lands in the case of zamindaris, mittas, and wholly inam villages, and represents the total area included in *patta* in the case of ryotwari.

Column 7.—Shows in the case of zemindaris, inams, and shrotriems, the average *peshkash* or quit-rent and water-tax payable to Government, and in the case of ryotwari the average assessment on ryoti holding, including water-tax and charge for second crop. The assessment represents the gross demand inclusive of remissions and deductions.

Bombay. The prescribed classification of tenures has not yet been adopted. The subject has been under the consideration of the Bombay Government; and the prescribed classification will be adopted in the table for 1895-96.

Under class 9, "others," the figures for 1894-95 represent unsurveyed Government villages not included in any of the specified tenures shewn in the return.

Column 2.—As regards peasant proprietors (class 1 in the Bombay form) the word "estate" means (as in Madras) the "holding." So with respect to pôt inams in khalsa villages, each alienated holding is classed as an estate. But in the case of entirely alienated villages the entire village is classed as one estate.

Column 5.—As regards ryotwari area the total is for occupied land only. The area of other estates is given in the gross, and includes unculturable and unoccupied land.

Bengal. This table is prepared triennially, as the variations in the entries from year to year are very slight. The table for 1892-93 has therefore been reproduced in the return for 1893-94.

There are no peasant proprietors in Bengal. Class 9, 'others,' includes Government estates under direct management, and also estates of recusant proprietors under the management of Government.

Column 3.—Shows in a lump the number of villages as returned by the Revenue Survey.

Column 4.—"Number of holders or shareholders" is, for the purposes of classes 1 to 4, 6, 7, and 8, taken as equivalent to "proprietors registered in the Collectorate."

N.-W. Provs. and Oudh. The word "estate" means a property separately assessed to land revenue.

Forest land, State properties, Government grants, nazul, petty grantees, areas of civil lines and cantonments and Government appropriations have been shown against class 9, "others;" but instructions have since been issued for the exclusion of Government forests and station areas, and as regards other lands the local Government has been asked to settle whether they are properly placed in Table D and to make such amendment as may be required on the basis of the principle that only land held *of* Government should be included in the table, and land held *by* Government (whether forests or other) should be excluded from it.

Column 2.—An estate paying a certain amount of revenue, but situated in three parganas of the district and shown in the Land Revenue Registers as three separate estates, each under that amount of revenue, is treated as one estate and not three estates.

Column 7.—The figures in this column are obtained by dividing the gross revenue by the number of estates. The gross revenue is the gross land revenue for each description of tenure. In the case of revenue-free tenures, or where the revenue is not ascertainable, the estimated revenue obtained for the purpose of assessing the 10 per cent cess is taken. In 1895 the Government of India directed that the *actual*, not the assumed, revenue should be shewn in column 7 against class 6 (holders of wholly or partially revenue-free tenures). It is presumed that the figures for 1894-95 were rendered in accordance with this instruction.

The divisions of tenures prescribed by the Government of India in 1884 were not adopted for Oudh until after 1889-90.

Panjab. The return is prepared quadrennially. The revision of statistics is not, however, relegated to a single year, but is gradually carried out in one village one year and in another the next during the whole period of four years.

Column 1.—About 90 per cent of the villages come into the third class of tenure. Class 9, "others," includes lands held on leases from Government without right of ownership.

Columns 2, 3, 6, and 7.—In the case of "holders of wholly or partly revenue-free tenures," these columns cannot be filled up unless only whole estates which are partially or entirely assigned or released are shown as revenue-free holdings, and all smaller holdings are omitted. The figures for this class are necessarily included in the total for classes 1 to 4, so long as class 6 is not made to consist exclusively of entire estates, for classes 1 to 4 and 9 now include every estate in the province.

Column 4.—The number of holders entered against class 6 is the number of revenue assignees.

The prescribed form was not adopted until the year 1891-92. Before that year (the return for 1884-85 excepted) the return was prepared in a form prescribed by the Panjab Government to suit local requirements.

Central Provs.

Previous to 1891-92 the Bhandara and Balaghat zamindaris were classed as "individuals under law of primogeniture," and small plot properties, known as malikmakbuza holdings, were included in the malguzari area and classed as "individuals and families under ordinary law" and "village communities." The former are now classed as "individuals and families under ordinary law," as they are not held under special *sanads*, and the latter as "peasant proprietors paying separately." Class 9 "others," includes lands excluded from Government forests and held on lease.

Column 2, class 5.—The figures for 1893-94 include 69,050 malikmakbuza plots; those for 1894-95 include 76,023 such plots.

Upper Burma.

In the case of the Shwebo district, tenants of State lands and owners of bahahaing land who paid water-rate, were classed as "individuals under law of primogeniture" in 1891-92, whereas in 1892-93 and subsequent years they have been classed as "individuals and families under ordinary law."

Holders of State land are classed as "peasant proprietors paying separately," and those of non-State land as "holders of wholly or partially revenue-free tenures," the ordinary non-State land tenure being included under the sub-head "in perpetuity."

Lower Burma.

With the following exceptions all tenures in Lower Burma are classed as "peasant proprietors paying separately":—

(*a*) Grants under the old waste land rules of Pegu and Arakan, which are classed under the heading "holders of wholly or partly revenue-free tenures."

(*b*) Grants under Lord Canning's rules, which are classed under the heading "landowners who have redeemed the revenue."

(*c*) Grants on special conditions of large areas, such as the grant to Mr. Mylne in Shwegyin or the grant to Messrs. Solomon and Cohen in Hanthawaddy, which are classed under the heading "others."

The figures for 1894-95 under the head "others" include chiefly suburban lots in Rangoon Town district. Instructions have since been issued for the exclusion of such lots from this table and from the agricultural statistics generally as such lots have no relation to agriculture.

Assam.

Classes 1 to 4 refer to permanently-settled estates only. All entries against these classes come under the sub-head "individuals and families under the ordinary law," as there are, as at present ascertained, no individuals holding under the law of primogeniture, and no village communities, properly so called, in the province.

Class 5, "peasant proprietors paying separately," does not include ryotwari area in a permanently settled tract.

Class 6, "holders of wholly or partly revenue-free tenures," includes holders of *lakhiraj* and *nisfkhiraj* estates, special tenures, and revenue-free estates.

Class 7, "landowners who have redeemed the revenue," includes holders of commuted estates and fee-simple grants compelled to redeem.

Class 9, "others": there are no such tenures in Assam as can be included under this class.

Column 3 shows collectively the number of villages taken from the last census report, as the number comprised in each class is not at present known.

Column 4 cannot be filled up, as the number of shareholders in an estate is not usually known. It is not the custom in any part of Assam (except, perhaps, in Goalpara) for all the shareholders to register their names.

Berar.

In the Wun district izara and palampat villages are shown under classes 3 and 4, sub-head (*c*), 'village communities,' while in the Basim district palampatdars are entered under class 7 (landholders who have redeemed the revenue) and izardars under class 8 (purchasers of waste lands). Class 9, "others," is blank in this province, as there are no tenures that would come under this class.

Class 5, "peasant proprietors paying separately," shows the occupants of survey numbers.

Column 2.—The number of estates in the Akola district is the number of survey numbers, each number being considered a separate estate; while in the Wun district each khatadar's holding is entered as an estate.

Column 5 shows the occupied area.

Coorg.

Class 6, "holders of wholly or partly revenue-free tenures," includes the jamma-umbli and jagir holdings.

Class 8, "purchasers of waste lands," includes coffee estates paying assessment.

Class 9, "others:" there are no tenures in Coorg that can be included under this heading.

Column 3 shows the number of villages collectively, not detailed under each class or estate.

Column 5 excludes bané, fallow and cardamom lands. The area given in this column is approximate, the survey of all holdings not having been completed.

Ajmere-Merwara.

The return was first prepared in 1890-91.

Class 5, "peasant proprietors paying separately," includes all ryotwari holdings.

Class 9, "others": the figures for 1894-95 represent khalsa land. Instructions have since been issued to place such land under the head "Revenue payers."

Mysore.

Some of the ryotwari lands have hitherto been shown under the first four classes of tenure and some under class 5. Since 1893-94 class 5 shows all ryotwari holdings and class 6 all inams (minor and whole villages).

TABLE E.

The object of this table is to show the number of voluntary and compulsory transfers of ownership of land or tenant-right, and the area so transferred. By voluntary transfers are meant transfers made by actual contract or gift, transfers by inheritance not being taken into account.

Instructions were issued in 1891 to the authorities of the Panjab and Central Provinces to the effect that the entries under "by order of Court" should show not merely the transfers occasioned by debt, but all forms of transfer effected through the medium of a Court. It is believed that this rule is observed in other provinces, but no definite information is available on this head.

The form now in use was prescribed in July 1891. It differs from the form prescribed in 1884, and that suggested by the Statistical Committee of 1866, in the following respects:—

1866 I.-E.-5.	1884 I.-E.-5.		1891 E.
Nature of tenure.	*Nature of tenure.*		*Nature of tenure.*
Great zamindaris, complete.			
Shares in such zamindaris, complete.			
Large zamindaris.			
Shares in such zamindaris.			
Small zamindaris.			
Shares in such zamindaris.			
Villages owned by cultivating communities.	Proprietors.	Revenue-paying.	Revenue-paying.
Shares in villages owned by cultivating communities.		Revenue-free.	Wholly or partially revenue-free.
Holdings of proprietary cultivators.			
Intermediate holdings of a transferable character.	Tenants who have statutory (or otherwise recognised) powers of transfers.		No alteration.
Holdings of ryots at fixed rates.			
Holdings of ryots with right of occupancy.			
Revenue-free tenures.			

Number of transfers recorded.	*Number of transfers.*	No alteration.
(*a*) By voluntary sale or gift.	(*a*) By private contract or gift.	
(*b*) By compulsory sale.	(*b*) By order of court.	
(*c*) By inheritance.	Omitted.	
Average area in acres of each holding transferred.	*Total area transferred.*	
(*a*) By voluntary sale.	(*a*) By private contract or gift.	
(*b*) By compulsory sale.	(*b*) By order of court.	
(*c*) By inheritance.	Omitted.	

GENERAL NOTES.

Transfers by inheritance are not included in this return.

It is optional with Local Governments to show or omit transfers of lands held by tenants.

The year to which the provincial returns relate ends on different dates in different provinces: in the Central Provinces, Upper Burma, Lower Burma, Assam, Berar, and Coorg the year ends on 31st March, in Madras, the North-Western Provinces, Oudh, Ajmere-Merwara, and Mysore on 30th June, and in the Panjab on 30th September.

PROVINCIAL NOTES.

Madras. Transfers by inheritance, or non-permanent transfers, such as leases, mortgages, etc., are not included. Only permanent transfers, for instance, by sale or gift, are included, when the parties concerned apply for and obtain transfers of revenue registry. These are shown under "private contract or gift." Under the heading 'by order of Court' are included all changes of registry under decrees of civil courts, whether the decrees were passed on disputes regarding title or by reason of debts incurred by judgment-debtors. Also cases in which lands are sold for arrears of revenue due to Government are included if such lands are purchased by private parties, but excluded if purchased by Government.

Transfers of tenant-right are not shown, the information not being available.

The entry under the head "revenue-paying" includes ryotwari holders paying full assessment, and permanently settled estates paying *peshkash*; while that under the head "wholly or partially revenue-free" relates to minor inams and whole in am villages.

Bombay. The return is not prepared. The question of registration of transfers has been under the consideration of the Bombay Government; and the return will probably be prepared next year.

Bengal. The return is not prepared, the necessary information not being available.

N.-W. P. and Oudh. The return relates to cases of sale of revenue-paying or revenue-free land only. Transfers by inheritance or non-permanent transfers, such as leases, usufructuary mortgages for short periods, are excluded

Statistics of transfers of tenant-right are not given. Transfers by gifts have not hitherto been shown, as the information was not available.

Under the heading 'By order of Court' are included merely those transfers which are the result of debt incurred by the judgment-debtor. In some districts this heading includes transfers for arrears of revenue, in others they do not.

Column 5, revenue-paying.—Figures of the Fyzabad and Partabgarh districts for 1893-94 are incomplete, the information for some of the parganas, which are under settlement, not being available.

Column 10, revenue-paying.—Figures for the Fyzabad and Barabanki districts for 1893-94 are incomplete, the information for some of the parganas, which are now under settlement, not being available.

Panjab. The return is prepared in a form prescribed by the Local Government, as the form prescribed by the Government of India is not applicable to the Panjab. Statistics for the different kinds of tenure are given collectively, figures for each kind not being available. The return includes all kinds of transfers relating to the tenant-rights of proprietors and occupancy tenants, but excludes transfers by inheritance. The transfers included in the return are, (1) partitions, (2) gifts and exchanges, (3) mortgages with possession, (4) redemption of mortgages, (5) sales and permanent transfers for value, (6) other transfers, which last includes cases of a miscellaneous nature such as enhancement of rent, errors corrected, etc. There are few cases of transfers for arrears of revenue, but if they do occur they are included under "by order of Court." In Rohtak, Montgomery and Gurdaspur such transfers are at present excluded.

Central Provs. Transfers of tenant-right have been included in the return since 1892-93. The figures against "proprietors" are filled up from returns compiled on the basis of mutation proceedings. Those against "tenants" are based on returns furnished by patwaris under Revenue Book Circular I-67, which directs that all transfers should be entered, excluding transfers by inheritance but including transfers by mortgage with possession as well as transfers by sale. Instructions have also been given to include in columns 2 and 4 all transfers based on an order of Court, whether effected in execution of a money decree or resulting from mortgage or from a disputed succession case, and in columns 7—11 and 17—21 all transfers effected privately with the exception of transfers by inheritance. The return does not include leases or mortgages without possession.

The words "by order of Court" are held to include transfers by order of a revenue court, for instance, for arrears of revenue, but such transfers are very rare in these provinces.

Burma. Transfers of landed property are not at present registered in Upper Burma; the information is collected by township officers. The return includes cases in which land has been permanently transferred by succession, partition, gift, sale, or other transaction, for valuable consideration.

In the Saigaing district, transfers by private contract or gift were not included in the returns for 1891-92 and former years.

The column "By order of a Court" does not include transfers by order of a revenue Court.

Assam. *Columns 12 to 21* exclude the areas transferred in the Sylhet and Goalpara districts, the information not being available. Transfers by inheritance and non-permanent transfers, such as leases or usufructuary mortgages, are excluded in some districts, but in most districts all kinds of transfers are entered, including transfers by inheritance. In four districts the column "by order of Court" includes transfers by order of a revenue court, while in three districts it does not. The number of such transfers is however very insignificant. This column also includes all kinds of cases in which transfer is made by order of a Court, (for instance, cases of disputed succession).

Ajmere-Merwara. The first return received from this province was for 1887-88. The return shows all kinds of transfers, including those by inheritance, and temporary transfers, such as leases or usufructuary mortgages. The column "by order of Court" includes transfers occasioned by debt incurred by judgment-debtors, and all kinds of transfers effected by order of Court. It also includes transfers by order of a revenue court and by order of a civil court.

Manpur (Central India). Transfers of landed property are not permitted in Manpur.

Coorg. The return includes all legal transfers of property (*a*) by voluntary action of the owners, (*b*) by virtue of decrees of civil and orders of revenue courts, (*c*) those accrued by succession, except temporary transfers, such as leases or usufructuary mortgages for short periods.

Transfers ordered by Courts in cases of disputed succession, and those occasioned by debt incurred by the judgment-debtors, are included under the heading 'by order of Court.' This heading also includes transfers ordered by civil courts from registered holders to decree-holders of lands sold by civil courts in satisfaction of decrees, and of holdings sold for arrears of revenue by the revenue authorities.

Berar. In Akola, Ellichpur, and Básim the return does not contain all kinds of transfers including those by inheritance: in Básim such transfers are placed under "by private contract or gift"; in Akola transfers of registered occupancy of fields, made under Settlement rule IX, are included; in Ellichpur non-permanent transfers, such as leases, are included, while in Akola and Básim they are excluded.

In Ellichpur, Básim, and Wun "by order of Court" includes all kinds of transfers effected by a court; in Akola, Buldána, and Amráoti it does not; transfers occasioned by debt incurred by the judgment-debtor are included in all districts (Amráoti excepted).

In Buldána, Amráoti, and Ellichpur "by order of Court" includes "by order of a revenue court," for instance, for arrears of revenue, while in Akola and Wun they do not.

STATEMENT OF CHANGES IN DISTRICT, DIVISIONAL AND PROVINCIAL BOUNDARIES, FROM 1891-92 TO 1894-95.

NOTE.—(1) There are no statistics of irrigation for Bengal, and the columns relating to irrigation are omitted from this table.
(2) The figures for 1890-91 in columns 3 to 5 include forest areas.

* Includes culturable waste other than fallow.

† These figures are apparently incorrect.

NOTE.—The prevailing tenure in the Bombay Presidency is the surveyed Ryotwari lands held under special tenures, such as (1) Talukdari, (2) Mehwasi, (3) Udhad jamabandi, and (4) Narvadavi and Bhagdari in Guzerat, and (5) Khoti and Izafat in the Konkan are shown under the head "Zamindari and village communities (temporarily settled)" in conformity with the Government of India's instructions in the footnote to column 1.

* NOTE.—Difference in figures of population between those in column 6 and those of the Census of 1891 for Khandesh, Násik, Hyderabad, and Thar and Párkar is due to territorial changes since the year of Census.

†In the case of Sind the total land revenue in column 5 includes consolidated land and water assessment levied on lands irrigated from canals.

NOTE.—This table is a reproduction in compressed form of the forecasts annually received from the local authorities. The figures in columns 2 and 3 represent the acreage and outturn of the year opposite which each figure is placed. The figures in columns 3 and 8 represent the acreage and outturn, as finally ascertained, of the year preceding the year opposite which the figures in columns 2 and 7 are placed. The figures in columns 4 and 9 represent the average acreage and outturn of a series of years previous to the year opposite which the figures are placed.

It should be noted that the figures for Native States are in most cases defective by the omission of States, or by errors, and must be accepted with reserve.

TABLE I—*continued.*

ESTIMATED AREA and YIELD of certain principal CROPS in each of the PROVINCES and in the NATIVE STATES from 1891-92 to 1895-96.

Provinces.	Area in acres, 000's omitted.					Yield in tons, 000's omitted.

(*a*) Figures for 1891-92 and 1892-93 included in 'Rest of India.' The figures for 1893-94 are defective.
(*b*) Figures for 1891-92 to 1893-94 included in 'Rest of India.'
(*c*) Includes figures for Central India and Hyderabad.
(*d*) Includes approximate figures for Hyderabad and a portion of Central India, also for Madras, Mysore, and Assam, in which the wheat area is unimportant. From 1894-95 figures for all the states in Central India and for Hyderabad have been shewn separately and those for Madras and Assam discontinued.
(*e*) Mysore only.
(*f*) Exclusive of Central India for which figures are not available.
